The crime scene: tested to destruction.

To really understand how safes are broken into in the 21st century, and where in your home they have to withstand attack, we set up a few crime scenes of our own. Extensive tests proved that we needed to incorporate several improved key features:

- extra thick body and door, reinforced with armour plated steel
- laser cut door, for minimal gap
- locks with heavy-duty revolving steel bolts in the door
- reinforced door hinge

Our range at a glance.
